Music Model
Cornerstone Assessment

Artistic Process: Performing
Traditional and Emerging Ensembles
INTRODUCTION

Intent of the Model Cornerstone Assessments

Model Cornerstone Assessments (MCAs) in music are tasks that provide formative and summative means to measure student achievement of performance standards in the National Core Music Standards. Each MCA focuses primarily on one Artistic Process (i.e., Creating, Performing, or Responding), and is designed as a series of curriculum-embedded assessment tasks, each of which measures students’ ability to carry out one or more process components.

Because these MCAs are still in development, for this pilot it is important for music teachers to follow all written guidelines so researchers can:

- evaluate and refine those guidelines;
- identify the extent to which the content and context of each assessment can be integrated into individual teachers’ curriculum; and ultimately
- compare achievement levels in the student work generated during piloting.

Although each MCA is designed so that it can be administered within one instructional sequence or unit, teachers may choose to spread the component parts of one MCA across multiple units or projects. Student work produced by these MCAs will be selected as benchmarks to illustrate the level of achievement envisioned in the National Core Music Standards.

Using the MCA document

MCAs are presented at key grades and each strand for each of the three artistic process. This document is available in a .pdf format with links for easy navigation within the document and to external links for .doc versions of worksheets. The next page provides the assessment description with each bubble being a link to a detailed description of the assessment.

General description of the Assessment Task

This MCA includes assessment tasks specific for each proficiency level of students. In some ensembles it may be appropriate to administer multiple tasks implemented based on individual achievement levels of students.

Students will select piece(s) to rehearse for a performance, documenting analysis, rehearsal, and refinement process. This MCA does not specify a particular notational or non-notational based performance medium and does not assess ability to sight-read. The task can be implemented with chamber ensembles, section rehearsals of larger ensembles, or students preparing solo.

Estimated time for Teaching and Assessment

Individual teachers can determine the length of time required to complete the assessment, but Assessment Strategy 1 could occur in one class period, Assessment Strategy 2 must allow students sufficient preparation for performance, and Assessment Strategy 3 could occur within one class period.
